ABSTRACT

The invention relates to a coating installation comprising a recipient (1) which is divided into a cathode side (3) and a substrate side (4) by means of a screen (2). The cathode side (3) and the substrate side (4) respectively have a direct extraction outlet (10, 16) and a gas admission (8, 14). The gas admission (8) on the cathode side (3) is connected to a process gas source (9) and the gas admission (14) for the substrate side (4) is connected to a reactive gas source (15).
